

See risk before it becomes an incident.

An always-on safety layer for the cameras and places your team already needs to see.

SAFESIGHT . TECH

Safety teams cannot be everywhere at once.

Hours of camera footage, multiple work areas and fast-moving conditions make consistent oversight difficult. Safety Vision helps teams focus attention where it matters while work is happening.

01

VISIBILITY

Monitor selected risks across cameras, areas and shifts.

02

RESPONSE

Route useful alerts to the people responsible for acting.

03

ASSURANCE

Keep a structured event record for review and learning.

Keep the cameras. Add the intelligence.

01 **CONNECT** Use compatible existing camera feeds or plan coverage around priority areas.

02 **DETECT** Configure selected safety events for the site and its working conditions.

03 **ACT** Notify designated people with useful context and retain a reviewable record.

Built around the places where risk moves.

01

CONSTRUCTION

Active zones, PPE, plant and pedestrian movement.

02

WAREHOUSING

Loading areas, forklifts and restricted access.

03

MANUFACTURING

Production floors, safe zones and procedures.

04

CRITICAL INFRASTRUCTURE

Controlled environments with high assurance needs.

● START WITH THE RISK

Show us what your safety team needs to see.

We start with your site, your priority risks and the people responsible for acting - then build the smallest useful solution around them.
